Application No. 09/605,421

AMENDMENTS TO THE CLAIMS

The following claims replace all prior versions and listings of claims in the application:

1. (currently amended) A method for identification of memory address allocation conflicts of a plurality of finite buffers within a defined memory space, comprising the steps of:

entering a list of said <u>finite</u> buffers and corresponding memory address allocations;

scanning said memory <u>address</u> allocations from a first memory address to a second memory address within said <u>defined</u> memory space;

creating a link list of primary memory addresses correlating to the start and end of each of said <u>finite</u> buffers;

creating an ordered list of said primary memory addresses and corresponding buffers which include said addresses from said <u>link list of primary addresses</u> ist memory addresses.

2-5. (Cancelled)
